

LIS Digital – AI Transformation Roadmap (Final Draft v3.7)

Assumptions & Limits

- Links validated on 2025-10-24; will be re-validated before final delivery.
- Pricing ranges are illustrative; re-validate at procurement/renewal.
- Residency & compliance: assume EU data stays in EU; verify DPAs/SCCs.
- GA4 schema varies (traffic_source vs event_params); ecommerce revenue fields differ per property.
- Team capacity: 10–30; timelines assume willing pilot clients and standard vendor tiers.

— Page break —

Executive Summary & Goals

- Objective: Reposition LIS Digital as an AI-forward agency while retaining brand/PR strengths.
- AI service pillars: Media Intelligence • AI Content Studio • Predictive Performance Analytics • Conversational Experiences (chatbots).
- 12-month targets: 40–60% faster content cycles; weekly actionable insights for top clients; predictive recommendations embedded in QBRs for ≥10 clients; 4–8 chatbot deployments improving lead qualification/CX.

— Page break —

Phased Transformation Plan (12–16 weeks)

Phase 0 (Weeks 1–2): Enablement & Governance

- AI Governance Charter (acceptable use, privacy, brand voice guardrails, human-in-the-loop, auditability)
- Knowledge base (SOPs, prompts, style guides, templates); sandbox
- Define pillar KPIs, SLAs; align pricing & packaging

Phase 1 (Weeks 3–6): Foundations

- Media Intelligence: platform selection; sentiment/topic taxonomy; weekly insight template
- AI Content Studio: brand voice framework; prompt library; QA/fact-check SOP

- Predictive Analytics: connect GA4/ad platforms; KPI model; forecasting & creative scoring prototypes
- Chatbots: choose 1–2 platforms; standard flows (FAQ, lead qualification, human handoff)

Phase 2 (Weeks 7–10): Pilots

- 1–2 pilots per pillar; codify wins; tighten SLAs; collect before/after metrics
- Validate pricing vs effort/platform costs; refine tiers

Phase 3 (Weeks 11–16): Scale & Commercialization

- Productize packages; cross-sell playbooks; role certifications
- Launch repositioning (website, collateral, webinars, outbound)

— Page break —

Tech/Software Stack by Function (with pros/cons)

Data & Media Monitoring

- Enterprise: Brandwatch / Meltwater / Sprinklr — Pros: coverage, governance; Cons: cost, complexity
- Mid-market: Talkwalker / Mention — Pros: faster setup; Cons: feature depth varies

Content Generation & QA

- LLMs: OpenAI / Anthropic Claude / Google Gemini — Pros: strong writing/context; Cons: usage costs/regional availability
- QA add-ons: plagiarism/fact-check; SEO: Surfer / Frase / Clearscope

Analytics & Forecasting

- Data: GA4 + BigQuery; BI: Looker Studio; ML: Python notebooks or DataRobot

Chatbots & CX

- Intercom / Voiceflow / Landbot (+ Zendesk/Salesforce Einstein if stack alignment needed)

Enablement & Operations

- CRM: HubSpot / Salesforce; PM: Asana / ClickUp; KB: Notion / Confluence; Governance: OneTrust

— Page break —

Vendor Selection Mapping (Scenarios → Tools)

Scenario	Recommended Tools	Why	Trade-offs
Enterprise governance-heavy	Sprinklr; Salesforce + Brandwatch; DataRobot; Confluence + OneTrust	Enterprise compliance, RBAC, residency	Higher cost & complexity; slower agility
Fast mid-market time-to-value	HubSpot + Intercom/Landbot; Talkwalker; BigQuery + Looker; Notion	Quick onboarding, templates, modular pricing	Feature ceilings at scale; lighter governance
Content at scale	OpenAI/Claude + Surfer/Clearscope; Asana; Notion prompts	Editorial control; SLA tracking	Requires QA & review workflow
Conversational design depth	Voiceflow (design) + Intercom (production) + CRM	Multi-channel, strong design + ops	Needs integration & conversation design
Analytics-forward	GA4→BigQuery→Looker; Python or DataRobot	Flexible BI; model control	Data/analytics engineering required

— Page break —

Implementation Notes & Integrations

- CRM/PM: Map opportunities to package SKUs; attach dashboards; SLA monitors (insights, content turnaround, intents resolved)

- Data sources: Confirm regional coverage; set residency; DPAs/SCCs; AI usage logs
- GA4→BigQuery→Looker: enable export • model tables/views • dashboards • uplift/budget fields
- Ad connectors: API pulls • normalize creative features • store in BigQuery • join GA4 outcomes
- Chatbot→CRM fields: Lead Score (num) • Qualification Status (enum) • Primary Intent (enum) • Transcript URL • Chatbot Source

— Page break —

Training Pathway (Roles, Curricula, Certifications)

Role	Skills	Tools	Curriculum Modules	Milestones	Certification
AI Services Lead	AI product mgmt, governance, pricing	Suite + PM/CRM	Charter, packaging, ROI	Charter & packages live; SLA tracking	Gold
Media Intelligence Analyst	Listening, taxonomy, storytelling	Brandwatch/Meltwater/Talkwalker	Dashboards, synthesis, alerts	Weekly insights; crisis protocol	Silver
AI Content Strategist/Editor	Prompting, brand voice, fact-check, SEO	LLM + SEO tools	Prompt design, QA flow	30–60% cycle-time gains; QA	Silver

				scorecards	
Performance Analyst	Attribution, forecasting, experiments	GA4, BigQuery, Looker	Forecasting, A/B, QBR	MAPE $\leq 15\%$; QBR uplift reports	Silver
Conversational Designer	Intents/entities, flows, metrics	Voiceflow/Intercom	Dialogue flows, analytics	$\geq 70\%$ intent resolution; CSAT lift	Silver
RevOps/Cli ent Success	Packaging, onboarding, value	CRM/PM	SLAs, playbooks, ROI	TTV ≤ 30 days; cross-sell rate tracked	Silver

— Page break —

Marketing Repositioning Plan

- ICPs: Tech/finance/healthcare & consumer; global/regional ops
- Positioning: “AI-forward brand communications delivering faster insights, adaptive content, and measurable performance.”
- Messaging pillars: speed-to-insight • brand-safe content at scale • predictive performance • conversational CX
- Proof: SOPs, demos, pilots, case metrics; 5 success stories
- Collateral: website pillar pages, packages one-pagers, demo videos, webinars, outbound sequences
- Thought leadership: monthly media-intelligence reports; quarterly creative-scoring benchmarks

— Page break —

SOPs & Example Workflows (KPIs, Baselines, Data Locations)

Data cadence: weekly from GA4, ad platforms, CRM, chatbot analytics, listening exports, PM tool

Placeholders: `[[platform:identifier]]` or `[[platform:report_url]]`

1) **AI-Assisted Content Production (press releases/blogs)**

- Baseline: cycle-time 10 days; first-pass approval 40–50%; factual error ~3%
- KPIs: cycle-time reduction $\geq 40\%$ (PM) • error $\leq 1\%$ (QA) • SEO $\geq 75/100$ • first-pass approval $\geq 70\%$
- Data locations: `pm_tool.tasks.content_workflow` • `cms_prod.content.published_posts` • `marketing_prod.model.content_performance` • `semrush_api.keywords.rankings`
- Dashboards: `[[looker:content_production_kpis_id]]` • `[[lookerstudio:content_production_report_url]]`
- Pass/Fail: Pass if KPIs met (or improved vs baseline); Fail if error $> 2\%$ or first-pass $< 50\%$

2) **Ad Ops Optimization (creative variant scoring)**

- Baseline: CTR 1.5–2.5%; CVR 2–3%; CPR benchmarks by channel
- KPIs: CTR lift $\geq 10\%$ • CVR lift $\geq 5\%$ • CPR improved $\geq 8\%$
- Data locations: `marketing_prod.ads.ad_stats_daily` • `marketing_prod.model.conversions_by_creative` • `ml_prod.predictions.creative_scores` • `experiments.ab_tests.results`
- Dashboards: `[[looker:ad_ops_creative_performance_id]]` • `[[tableau:ad_ops_view_path]]`
- Pass/Fail: Pass if ≥ 2 KPIs met; Fail if no lift vs control over 2 cycles

3) **Predictive QBR Analytics Reporting**

- Baseline: forecast MAPE ~25%; recommendation adoption ~20%
- KPIs: MAPE $\leq 15\%$ • $\geq 60\%$ recommendations implemented • ROI uplift $\geq 5\%$ in 1 quarter
- Data locations: `ml_prod.forecasts.quarterly_pipeline` • `crm_prod.opportunities.pipeline_forecast` • `marketing_prod.model.revenue_attribution` • `marketing_prod.model.campaign_roi`
- Dashboards: `[[looker:qbr_executive_summary_id]]` • `[[hubspot:custom_report_url]]`
- Pass/Fail: Pass if MAPE $\leq 15\%$ and ≥ 1 recommendation per segment; Fail if MAPE $> 20\%$ and no adoption

4) 🔍 Media Intelligence Weekly Synthesis & Alerts

- Baseline: time-to-alert 4 hours; insights adopted 0–1/month
- KPIs: alert ≤60 minutes • ≥2 insights adopted/month • SOV +≥3%/quarter
- Data locations: listening_prod.exports.share_of_voice •
listening_prod.exports.sentiment_analysis •
listening_prod.alerts.crisis_triggers • listening_prod.alerts.response_time •
listening_prod.exports.trending_topics
- Dashboards: [[brandwatch:dashboard_url]] •
[[looker:media_intelligence_weekly_id]]
- Pass/Fail: Pass if SLA met and ≥1 insight adopted monthly; Fail if repeated breaches

5) 🤝 Sales Enablement (proposal copilot)

- Baseline: turnaround 5 business days; cross-sell attach 10–15%
- KPIs: turnaround ≤48 hours • win rate +≥5% • attach ≥20%
- Data locations: sales_enablement.proposals.generated •
crm_prod.model.time_to_proposal •
sales_enablement.proposals.acceptance_rate •
crm_prod.model.proposal_win_rate •
sales_enablement.proposals.content_reuse
- Dashboards: [[looker:sales_enablement_kpis_id]] •
[[pandadoc_or_proposify:analytics_url]]
- Pass/Fail: Pass if turnaround met and ≥1 attachment added; Fail if repeated misses

6) 🚀 Client Onboarding (chatbot + dashboards)

- Baseline: TTV 45–60 days; intent resolution 50–60%; dashboard WAU 30–40%
- KPIs: TTV ≤30 days • intent resolution ≥70% • dashboard WAU ≥60%
- Data locations: chatbot_prod.analytics.engagement •
product_analytics.onboarding.time_to_value •
bi_prod.usage.dashboard_adoption •
support_prod.tickets.onboarding_volume •
surveys.responses.onboarding_satisfaction
- Dashboards: [[intercom:onboarding_reports_url]] •
[[looker:client_onboarding_kpis_id]]
- Pass/Fail: Pass if all KPIs met; Fail if 2 consecutive SLA misses

7) 🛡️ Crisis Monitoring Protocol

- Baseline: response 2–4 hours; sentiment recovery >14 days
- KPIs: response ≤60 minutes • recovery ≤7 days • neutral/positive coverage ≥60% post-crisis week

- Data locations: listening_prod.alerts.crisis_response • listening_prod.alerts.spike_events • listening_prod.alerts.sentiment_drops • incident_mgmt.escalations.crisis_events • listening_prod.analysis.sentiment_recovery
- Dashboards: [[brandwatch:crisis_monitoring_url]] • [[looker:crisis_protocol_kpis_id]]
- Pass/Fail: Pass if SLA met & recovery achieved; Fail if repeated breaches

— Page break —

\$ Pricing & Packaging (Illustrative; Risks & Assumptions)

Package	Scope	Deliverables	SLA	Price Range	Risks/Notes
Media Intelligence (retainer)	Monitoring, taxonomy, insights	Weekly insights report, crisis alerts	Weekly insights; alert ≤60m	\$4k–\$12k/mo	Data source license changes; regional coverage
AI Content Studio (retainer)	PR/blog/social copy gen + QA	Drafts + editorial review + SEO	3–5 business day turnaround	\$6k–\$20k/mo	Model/API overage; brand voice QA
Performance Analytics (retainer)	Forecasting, scoring, QBR	Dashboards, recommendations, QBR deck	Quarterly predictive review	\$8k–\$25k/mo	Accuracy (MAPE ≤15%); adoption
Chatbot Project	Design, build, integrate	Flows, CRM mapping, analytics	Go-live + monthly optimization	\$15k–\$50k + \$2k–\$8k/mo	Intent resolution ≥70%; handoff

Predictive Analytics Project	Data modeling + dashboards	Forecasting & ROI views	Quarter-end delivery	\$20k–\$60k	Data quality; schema alignment
------------------------------	----------------------------	-------------------------	----------------------	-------------	--------------------------------

- Usage add-ons: per content \$300–\$1,200; per extra data source \$500–\$3,000/mo; premium model/API pass-through + margin
- ROI framing: production time –30–60%; insights turnaround hours (vs days); CTR/CVR +5–20% typical ranges
- Procurement re-validation: re-check pricing/SLAs/caps before proposals/renewals

— Page break —

Success Stories (Authoritative, Quantified, Dated)

- Links validated on 2025-10-24; will be re-validated before final delivery
- Citron Hygiene × Innovation Visual (2023): +155% YoY chatbot leads; +60% conversations (May); +200% MoM leads (June) — <https://www.innovationvisual.com/case-studies/citron-hygiene-chatbots-implementation/>
- Neuro × Meltwater (Mar 2025): +406% YoY sales growth — <https://www.meltwater.com/en/customer-stories/neuro>
- Lifesight (Oct 2024): +45% iRevenue via iROAS optimization — <https://lifesight.io/resources/lifesights-iroas-optimization-boosts-irevenue-by-45-for-omni-channel-retailer/>
- Enty.io × Writesonic (2025): –75% content creation time — <https://writesonic.com/case-study/enty-io>
- HubSpot AI email (Feb 2025): +82% conversions — <https://blog.hubspot.com/marketing/ai-email-conversions>

— Page break —

GA4→BigQuery→Looker Pipeline (Schema Variations & SQL Notes)

- Schema note: Use traffic_source for source/medium when present; otherwise derive from event_params
- Ecommerce caveat: ecommerce.purchase_revenue vs ecommerce.total_item_revenue (and/or parameters with key='value'); inspect export and adjust nested paths
- Views to implement: sessions_by_day • conversions_by_channel (preferred & fallback) • revenue_kpis • creative_scoring_input

— Page break —

Formatting Handoff Checklist

- Create dashboard registry (SOP, platform, dashboard name, ID/URL, owner, access group, last validated)
- Capture canonical URLs/IDs (avoid preview links); validate access (roles/groups)
- Link checks in incognito; owner assignment; version tags
- Replace placeholders `[[platform:identifier]]` in SOP sections with validated IDs/URLs; update registry link in Appendix B
- Quarterly audit of links/access
- Cross-reference: feeds into final formatting to produce a Google Doc with H1/H2 headers, a Table of Contents, internal links, and clickable references

— Page break —

Appendix B: KPI Dashboard Registry Reference

- Registry link placeholder: `[[pm:kpi_dashboard_registry_doc_link]]`
- Monthly ops review; quarterly re-validation
